

MAEIL STRENGTHENS GLOBAL POSITION THROUGH ALLIANCE WITH INTTRA

MAEIL Information Systems Engineering, INTTRA's most recent alliance partner, is a Portugal-based systems and software development company established in 1999. MAEIL delivers a technology suite named Transporter that enables the management of end-to-end shipment business processes to help shipping industry businesses increase efficiencies, grow revenue and reduce costs. Freight forwarder clients effectively manage sales, import and export documentation, container control, financial processes, statistics, and EDI connections with customs and port authorities with MAEIL technology. Transporter has been adopted by a broad range of users including ocean carriers and agents, freight forwarders, and haulers.

As an INTTRA alliance partner, MAEIL's customers can now seamlessly connect to INTTRA's multi-carrier platform to streamline the processing of bookings and shipping instructions, and access global sailing schedules and track and trace visibility data. MAEIL customers are realizing the benefits of time and cost savings, as well as enhanced service capabilities. INTTRA's global standards for container shipment documentation simplify processing and enable logistics service providers to rapidly and accurately service customers with timely shipment information.

"We are pleased to be partnering with INTTRA to expand our penetration of global markets and advance the opportunities offered from aligning with an e-commerce platform with the depth and breadth of INTTRA," said Hugo Duarte da Fonseca, MAEIL, Managing Partner.

Duarte da Fonseca continued, "By automating and increasing the flow of information between global shipping partners we create a collaborative network that enhances global supply chain operations and boosts time and cost savings. Our next innovation is a specific solution for shippers, named Shipperline (www.shipperform.com) that manages shipments from bidding to invoicing. Users access Shipperline via the Web, mobile, or in the cloud, with a software as a service model (SaaS)."

"We are pleased to be partnering with INTTRA to expand our penetration of global markets and advance the opportunities offered from aligning with an e-commerce platform with the depth and breadth of INTTRA," said Hugo Duarte da Fonseca, MAEIL, Managing Partner.
