

UNIVERSAL CARRIER ACCESS

How can INTTRA help you?

INTTRA's mission is to be the preferred global e-commerce shipping platform. We combine advanced solutions for organizing and streamlining shipment processes with one simple connection to the world's largest network of ocean carriers.

Today, INTTRA's platform is more relevant to ocean shippers than ever before. Over 90% of shippers use more than one carrier to meet their global container shipping needs. This requires dealing with different systems and documentation processes. At INTTRA, we offer an integrated platform and the right tools to complete the task and get customer transactions done fast.

What does INTTRA offer?

INTTRA offers a comprehensive range of tools to help you plan, process and manage your shipments giving you the best all-round service available. The e-commerce tools are flexible and easy to use. INTTRA derives its revenues from carriers seeking to adopt industry standard processes and to provide their customers with a greater level of convenience and service.

Universal Carrier Access

Universal Carrier Access, or UCA, is a new INTTRA service that allows shippers and forwarders to create and send shipping instructions to all carriers - INTTRA members as well as non-members. Universal Carrier Access eliminates the need for multiple systems and processes while ensuring that all carriers receive standardized shipment details through INTTRA.

UCA Link

UCA for SI-Link ("UCA Link") allows shippers and forwarders to submit SIs to ANY ocean carrier or NVOCC through one, standard EDI or XML connection. With UCA Link, Customers are more efficient because they need only one process for submitting shipping instructions to all their carriers - there's no need for separate processes for each carrier. And, with UCA Link, customers minimize EDI costs - customers implement just one EDI connection - with INTTRA - and customers monitor and track all their shipping-instructions in one place.

UCA Desktop

UCA for INTTRA Desktop ("UCA Desktop") allows shippers and forwarders to take advantage of INTTRA Desktop's intuitive "B/L-style" interface, easy-to-use templates and favorites to reach all their ocean carriers and NVOs. With UCA Desktop, customers save time and money by eliminating the need for separate processes and systems to manage their ocean shipments. Also, with support for over 16 languages, INTTRA Desktop makes creating and sending SIs a quick and simple process world-wide.

Regardless of which channel you use - INTTRA Link or Desktop - INTTRA validates all SIs using the same logic and business rules. This means UCA carriers receive the same, high level of data quality available to member carriers. UCA Carriers receive shipping instructions in a common, industry-standard format, as opposed to receiving different formats from each customer.

UCA Customer Benefits:

- One standard process for all carriers brings increased customer efficiencies.
- One EDI or XML connection minimizes integration and maintenance costs.
- Customers monitor and track all their shipments in one place.
- INTTRA's industry standard layout and validation logic creates a consistent, high-quality SI data stream to all carriers.
- INTTRA's expert Global Support and Customer Service Team supports all your SI transactions on a 24/7 basis.

UCA features include:

- One common, industry-standard format brings increased carrier efficiencies.
- Consistent, high level of data quality means fewer errors and less rework.

INTTRA Carrier network

If you use any one of these carriers, we can help you manage your shipments more efficiently

Our carrier network is expanding rapidly. Please contact INTTRA's local sales office or visit www.inttra.com for the latest list of participating carriers.

Joining INTRRA has never been easier

To get on board with INTRRA, simply call our local sales office or customer service team.
