I. Audience

This document is intended for business, technical and EDI personnel engaged in electronic connection with INTTRA for the purpose of receiving an application error and acknowledgment XML VGM RESPONSE in response to a submitted EDI XML VGM transaction.

The following sections provide information regarding General Conventions, Message Flow, and Message Specifications. Additional reference guides for purposes of establishing Internet based file exchange are also identified.

II. Business Process Rules

XML VGM RESPONSE transactions are generated and sent for each XML VGM transaction received.

1. INTTRA receives the VGM transaction performs business logic and sends a XML VGM RESPONSE.
2. INTTRA sends a XML VGM RESPONSE transaction when a CONTRL transaction is received from the Carrier/Terminal in response to receiving a VERMAS transaction.
3. INTTRA sends a XML VGM RESPONSE transaction when an APERAK is received from the Carrier/Terminal in response to a VERMAS transaction.

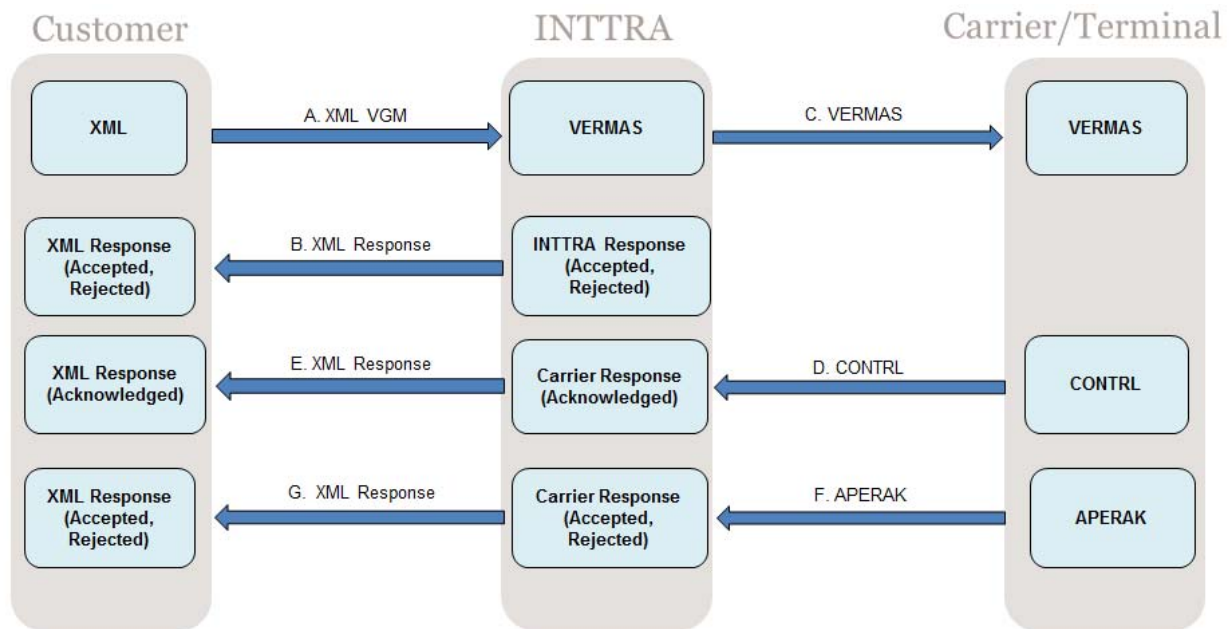

III. General Conventions

IV. Implementation

Version 1.0 of the INTTRA XML VGM RESPONSE Message represents the EDI transaction format by which INTTRA sends errors and acknowledgments whether or not the submitted VGM transaction was successfully processed by INTTRA and Carrier/Terminal's system.

All examples of Segment data are provided as guides only and not to be taken literally.

V. Message Flow

- A. INTTRA receives an XML VGM transaction from a Submitter, and creates and sends a VERMAS transaction to the Carrier/Terminal.
- B. INTTRA sends an XML VGM RESPONSE to the Submitter for the XML VGM transaction reporting acceptance or rejection by INTTRA.
- C. INTTRA sends a VERMAS transaction to the Carrier/Terminal (if XML VGM transaction was accepted).
- D. INTTRA receives a CONTRL transaction from the Carrier/Terminal in response to the VERMAS transaction.
- E. INTTRA sends an XML VGM RESPONSE to the Submitter for the VERMAS transaction acknowledged by the Carrier/Terminal (receipt of a CONTRL transaction from the carrier/terminal).
- F. INTTRA receives an APERAK from the Carrier/Terminal indicating acceptance or rejection of the VERMAS transaction by the Carrier/Terminal.
- G. INTTRA sends an XML VGM RESPONSE to the Submitter for the APERAK received from the Carrier/Terminal reporting acceptance or rejection of the VERMAS transaction by the Carrier/Terminal.

Carrier/Terminal may send CONTRL, only APERAK, only or both transactions. XML VGM RESPONSEs will be sent to submitter accordingly. So submitter may only receive (F) Acknowledgment XML VGM RESPONSE or (H) Acceptance or Rejection XML VGM RESPONSE or both.

VI. VGM XML RESPONSE Revision History

A. Changes from version 1.0 (September 9, 2016) to version 1.1 (July 25, 2017)

Added TransactionUniqueIdentifier.

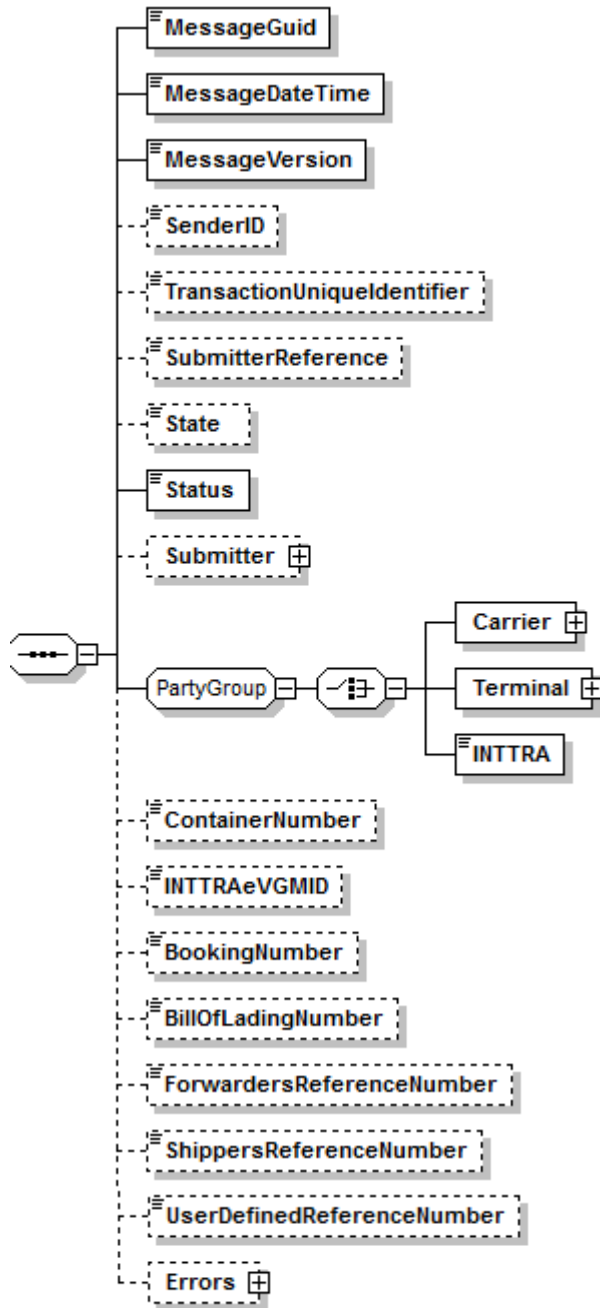

VII. XML VGM RESPONSE Message Specification

element	RespondVGM									
properties	min use	1	max use	1	min size		max size		type	
description	Root element for XML message RESPONDVGM.									
Annotation	Note that the encoding will be set to ISO-8859-1 which is the character set supported by INTTRA.									

element	MessageGuid	min use	1	max use	1
element	MessageDateTime	min use	1	max use	1
element	MessageVersion	min use	1	max use	1
element	SenderID	min use	0	max use	1
element	TransactionUniqueIdentifier	min use	0	max use	1
element	SubmitterReference	min use	0	max use	1
element	State	min use	0	max use	1
element	Status	min use	1	max use	1
element	Submitter	min use	0	max use	1
element	PartyGroup	min use	1	max use	1
element	ContainerNumber	min use	0	max use	1
element	INTTRAeVGMID	min use	0	max use	1
element	BookingNumber	min use	0	max use	1
element	BillOfLadingNumber	min use	0	max use	1
element	ForwardersReferenceNumber	min use	0	max use	1
element	ShippersReferenceNumber	min use	0	max use	1
element	UserDefinedReferenceNumber	min use	0	max use	1
element	Errors	min use	0	max use	1

diagram

Element	MessageGuid									
Properties	min use	1	max use	1	min size		max size		type	string
Description	Unique Identifier for the message									
Annotation										

element	MessageDateTime									
properties	min use	1	max use	1	min size		max size		type	datetime
description	Date time when the message was created.									
Annotation	Time will be UTC/GMT. Format: YYYY-MM-DDTHH:MM:SS Example: 2016-09-03T09:30:00									

element	MessageVersion									
properties	min use	1	max use	1	min size		max size		type	string
description	Version of the Schema/IG.									
Annotation	Defaulted to 1.0									

element	SenderID									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	SenderID of the response									
Annotation	INTTRA									

element	SubmitterReference									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	Submitter's reference sent in the VGM transaction.									

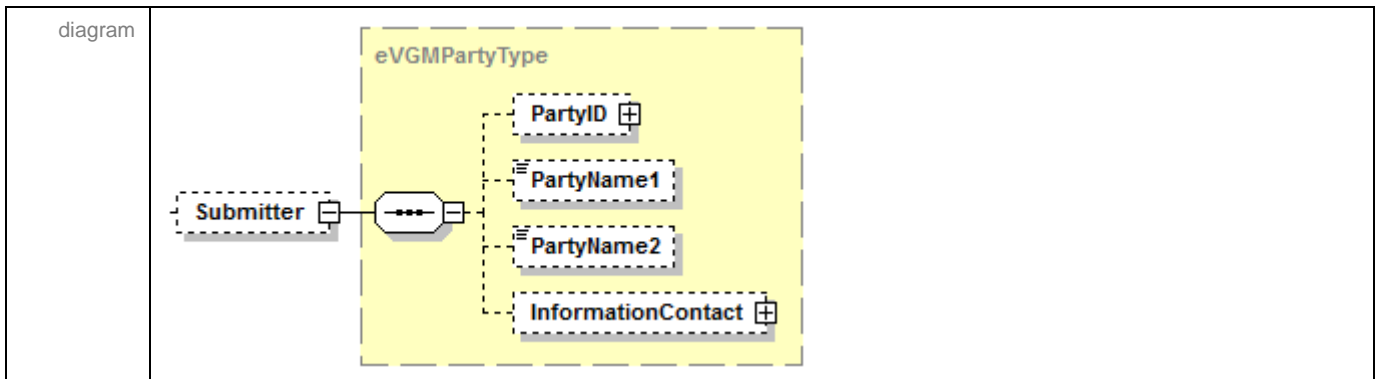

element	TransactionUniqueIdentifier									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	<p>This element will contain the "MessageGuid of the submitted eVGM transaction or the "Shipment Identification number" of the Shipping Instruction transaction when the eVGM was submitted within a Shipping Instruction transaction.</p> <p>For an "INTTRA" APERAK it will always be populated.</p> <p>For a "Carrier" APERAK it will only be populated if the customer preference "Transaction Unique Identifier" is activated. The element will only be populated if the VGM was submitted via a eVGM transaction or a Shipping Instruction with VGM information."</p>									

element	State									
properties	min use	1	max use	1	min size	1	max size	8	type	token
description	Indicates the state of the VGM transaction being responded to.									
attributes	Name	type	max size	Use	enumeration			Annotations		
					Original			Initial transmission		
					Amend			Changes to previous transmission		
					Cancel			Cancel of a previous transmission		

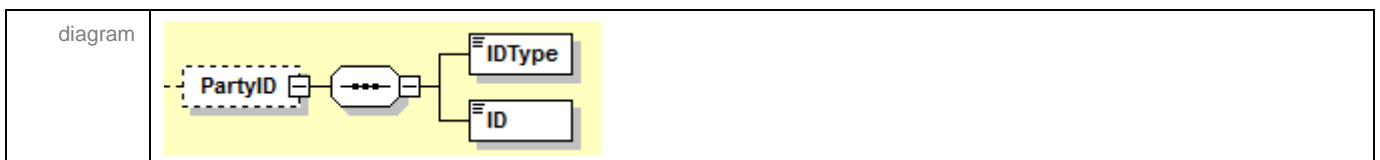

element	Status									
properties	min use	1	max use	1	min size	1	max size	12	type	token
description	Indicates the status of the VGM transaction.									
Annotation	Indicates the status of the VGM transaction reported by INTTRA, Carrier or Terminal.									
attributes	Name	type	max size	Use	Enumeration			Annotations		
					Acknowledged			VERMAS transaction was Acknowledged by the Carrier/Terminal		
					Accepted			VERMAS transaction was Accepted by INTTRA/Carrier/Terminal		
					Rejected			VERMAS transaction was Rejected by INTTRA/Carrier/Terminal		

Diagram										
---------	---	--	--	--	--	--	--	--	--	--

element	Submitter									
properties	min use	0	max use	1	min size		max size		type	
description	The party that submitted the VGM transaction.									
	Will only be populated if the customer preference “Add Submitter” is activated.									
Annotation	Identifies the party that submitted the VGM transaction.									

element	Submitter									
properties	min use	0	max use	1	min size		max size		type	
description		The party that submitted the VGM transaction.								
Annotation										
element	PartyID			min use	0	max use	1			
element	PartyName1			min use	0	max use	1			
element	PartyName2			min use	0	max use	1			
element	InformationContact			min use	0	max use	1			

element	PartyID									
properties	min use	0	max use	0	min size	1	max size	35	type	string
description		Unique Identifier for the Party								
Annotation		Will be an INTTRA Company ID or Partner Alias established by the subscriber in INTTRA's system.								

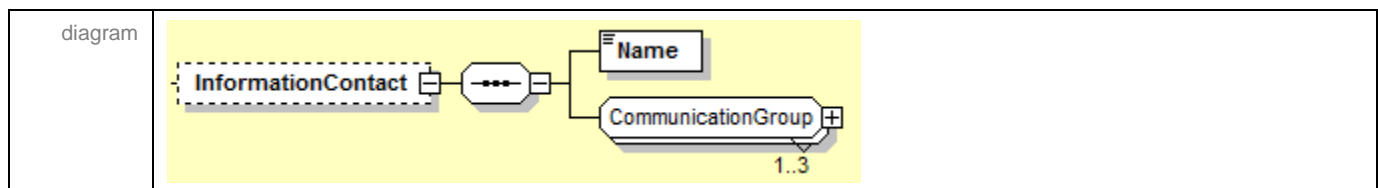

element	IDType			min use	1	max use	1			
element	ID			min use	1	max use	1			

element	IDType									
properties	min use	1	max use	1	min size		max size		type	token
description	Identified the type of ID in the ID element									
attributes	name		type	max size	use	enumeration		Annotations		
						INTTRACompanyID				
						PartnerAlias				

element	ID									
properties	min use	1	max use	1	min size	1	max size	35	type	string
description	ID identified by IDType element									
Annotation	This will be either an INTTRA ID or Partner Alias established in INTTRA's system by the subscriber who is receiving the transaction.									

element	PartyName1									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	Name of Party									

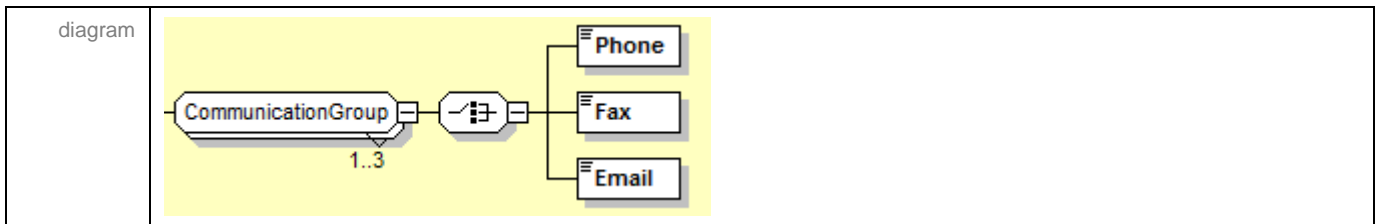

element	PartyName2									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	Name of Party									
Annotation	Party Name 2 will only be provided when Party Name 1 is provided.									

element	InformationContact									
properties	min use	0	max use	1	min size		max size		type	
description	Contact Information									
Annotation										

element	Name		min use	1	max use	1
element	CommunicationGroup		min use	1	max use	3

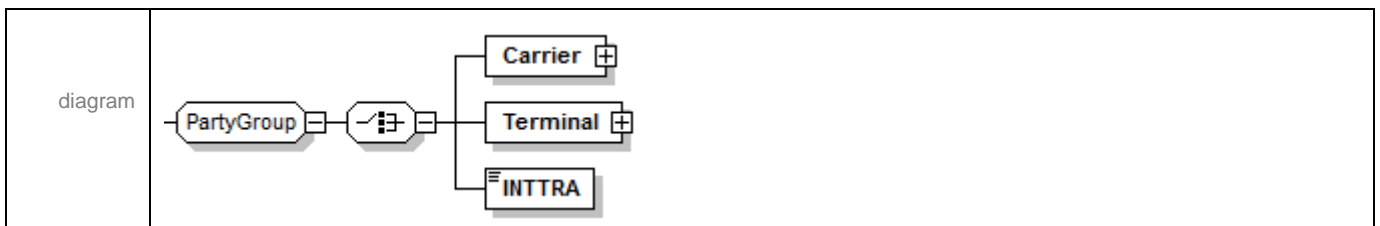

element	Name									
properties	min use	1	max use	1	min size	1	max size	256	type	string
description	Contact's Name									
Annotation	When Contact Name is provided, at least one Phone, Fax, or Email will also be provided.									

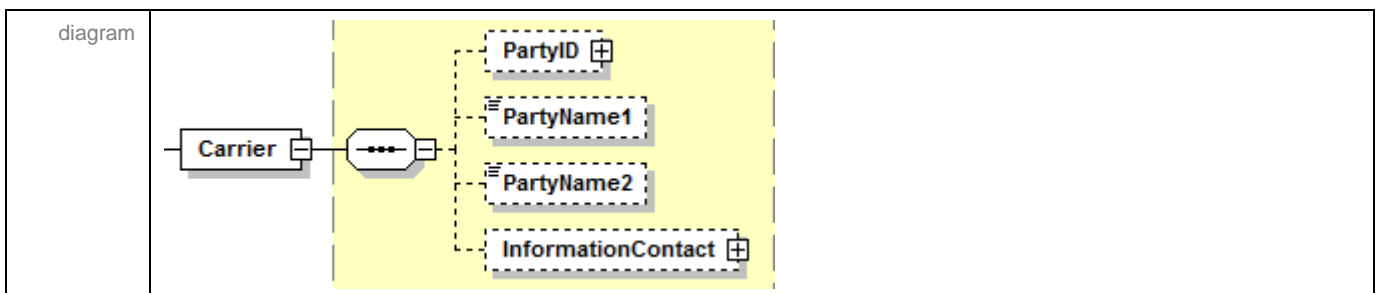

element	Phone									
properties	min use	0	max use	1	min size	1	max size	512	type	string
description	Contact's phone number									
Annotation	When Contact Name is provided, then at least one of Phone, Fax, or Email will be provided.									

element	Fax									
properties	min use	0	max use	1	min size	1	max size	512	type	string
description	Contact's fax number									
Annotation	When Contact Name is provided, then at least one of Phone, Fax, or Email will be provided.									

element	Email									
properties	min use	0	max use	1	min size	1	max size	512	type	string
description	Contact's email address									
Annotation	When Contact Name is provided, then at least one of Phone, Fax, or Email will be provided.									

element	PartyGroup									
properties	min use	1	max use	1	min size		max size		type	
description	The party that is responding to the VGM transaction.									
Annotation	Identifies the party that is responding to the VGM transaction.									

One of Carrier, Terminal or INTTRA will be provided in the transaction. When response is from INTTRA no PartyID, PartyName or InformationContact will be provided.
 It will show as (**<INTTRA>**INTTRA**</INTTRA>**)

This document only shows Carrier information as an example. Terminal will follow the same format. When response is from INTTRA it will be sent as indicated above.

element	Carrier									
properties	min use	0	max use	1	min size		max size		type	
description	The party that is responding to the VGM transaction.									
Annotation										
element	PartyID			min use	0	max use	1			
element	PartyName1			min use	0	max use	1			
element	PartyName2			min use	0	max use	1			
element	InformationContact			min use	0	max use	1			

element	PartyID									
properties	min use	0	max use	0	min size	1	max size	35	type	string
description	Unique Identifier for the Party									
Annotation	Will be an INTTRA Company ID or Partner Alias established by the subscriber in INTTRA's system.									

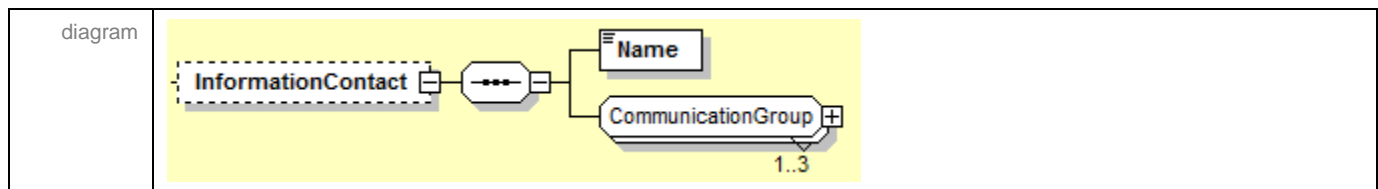

element	IDType			min use	1	max use	1			
element	ID			min use	1	max use	1			

element	IDType									
properties	min use	1	max use	1	min size		max size		type	token
description	Identified the type of ID in the ID element									
attributes	name	type	max size	use	enumeration			Annotations		
					INTTRACompanyID					
					PartnerAlias					

element	ID									
properties	min use	1	max use	1	min size	1	max size	35	type	string
description	ID identified by IDType element									
Annotation	This will be either an INTTRA ID or Partner Alias established in INTTRA's system by the subscriber who is receiving the transaction.									

element	PartyName1									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	Name of Party									

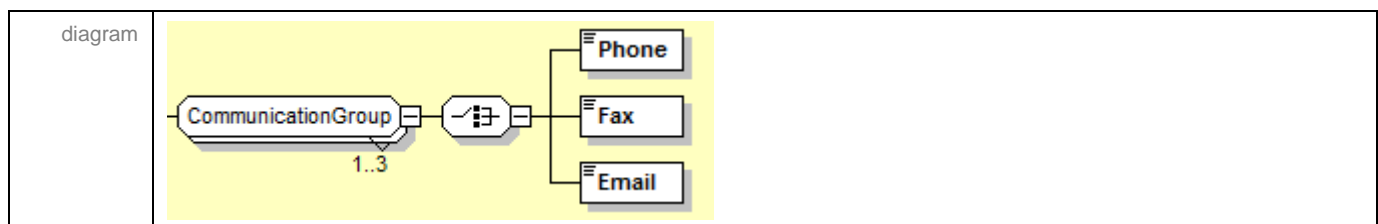

element	PartyName2									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	Name of Party									
Annotation	Party Name 2 will only be provided when Party Name 1 is provided.									

element	InformationContact									
properties	min use	0	max use	1	min size		max size		type	
description	Contact Information									
Annotation										

element	Name		min use	1	max use	1
element	CommunicationGroup		min use	1	max use	3

element	Name									
properties	min use	1	max use	1	min size	1	max size	256	type	string
description	Contact's Name									
Annotation	When Contact Name is provided, at least one Phone, Fax, or Email will also be provided.									

element	Phone									
properties	min use	0	max use	1	min size	1	max size	512	type	string
description	Contact's phone number									
Annotation	When Contact Name is provided, then at least one of Phone, Fax, or Email will be provided.									

element	Fax									
properties	min use	0	max use	1	min size	1	max size	512	type	string
description	Contact's fax number									
Annotation	When Contact Name is provided, then at least one of Phone, Fax, or Email will be provided.									

element	Email									
properties	min use	0	max use	1	min size	1	max size	512	type	string
description	Contact's email address									

Annotation	When Contact Name is provided, then at least one of Phone, Fax, or Email will be provided.
------------	--

diagram	
---------	---

element	INTTRA									
properties	min use	0	max use	1	min size		max size		type	
description	INTTRA's response to the VGM transaction (see Party Group for format when INTTRA is responding).									

element	ContainerNumber									
properties	min use	0	max use	1	min size	4	max size	17	type	string
description	Container number of the VGM transaction.									
Annotation										

element	INTTRAeVGMID									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	Unique ID assigned by INTTRA to the VGM transaction.									
Annotation	This ID is assigned when a VGM transaction successfully processes into INTTRA's system.									

element	BookingNumber									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	Booking number of the VGM transaction.									
Annotation	If a booking number is sent in the VGM transaction it will be sent back in this XML VGM RESPONSE.									

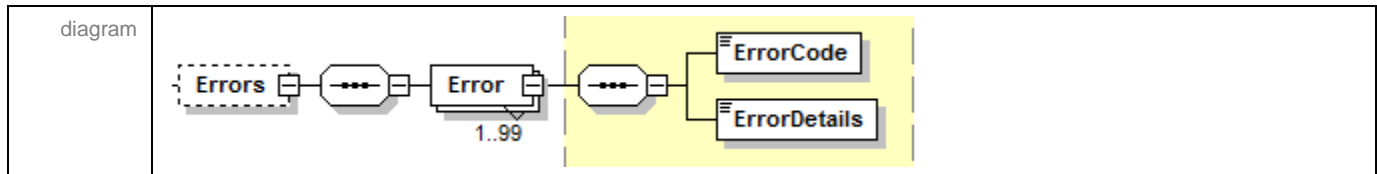

element	BillOfLadingNumber									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	Bill of lading number sent in the VGM transaction.									
Annotation	If a bill of lading number is sent in the VGM transaction it will be sent back in this XML VGM RESPONSE.									

element	ForwardersReferenceNumber									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	Forwarder reference number sent in the VERMAS transaction.									
Annotation	If a forwarder reference number is sent in the VGM transaction it will be sent back in this XML VGM RESPONSE.									

element	ShippersReferenceNumber									
properties	min use	0	max use	1	min size	1	max size	70	type	string
description	Shipper's reference number sent in the VERMAS transaction.									
Annotation	If a shipper's reference number is sent in the VGM transaction it will be sent back in this XML VGM RESPONSE.									

element	UserDefinedReferenceNumber									
---------	-----------------------------------	--	--	--	--	--	--	--	--	--

properties	min use	0	max use	1	min size	1	max size	70	type	string
description	User defined reference sent in the VERMAS transaction.									
Annotation	If a user defined reference is sent in the VGM transaction it will be sent back in this XML VGM RESPONSE.									

element	Errors									
properties	min use	0	max use	1	min size		max size		type	string
description	Errors									
Annotation										

element	Error									
properties	min use	1	max use	99	min size		max size		type	
description	Error									
Annotation	When Status is "Rejected" at least one error will be sent. There can be multiple errors.									

element	ErrorCode	min use	1	max use	1
element	ErrorDetails	min use	1	max use	1

element	ErrorCode									
properties	min use	1	max use	1	min size	1	max size	8	type	string
description	Code assigned to the error									
Annotation										

element	ErrorDetails									
properties	min use	1	max use	1	min size	1	max size	512	type	string
description	Description of the error									
Annotation
